MC- ADMIX 303

Fast Setting Waterproofing Admixture

Description :

MC-Admix 303 is a ready to use , Liquid waterproofing compound which sets rapidly when mixed with fresh normal portland cement to seal areas of severe water leakage .

Uses :

MC- Admix 303 is used for :

- ◆ Stop flowing of water instantly .
- ◆ Preliminary water proofing work.
- ◆ Fixing bolts and anchors.

Technical Data :

Type	: Alkaline Liquid
Colour	: Transparent
Specific Gravity	: 1.25 ± 0.02 kg/L
Setting Time	: 15 - 45 sec.
Chloride	: Free
Shelf Life	: Unlimited when unopened

Dosage :

MC- Admix 303 can be diluted 1 : 1 to 1 : 4 with clean water depending on the type of application and amount of water leakage and water pressure .

Application :

- ◆ Concrete surface receiving **MC-Admix 303** mortar should be completely clean and rough .
- ◆ Remove all loose particles .
- ◆ Start by plugging the major areas of leakage, in the same time allow the water to continue to flow through centered plastic tube.
- ◆ Remove the plastic tube and plug the hole with **MC-Admix 303** and cement

Packaging :

20 ,200 kg .

Recommendations:

- ♦ Mix only the amount of **MC-Admix 303** and cement that can be used immediately .
- ♦ Mixing water should be clean free from any components harmful to cement use clean container for mixing .
- ♦ First pour **MC-Admix 303** into the container then add the cement (sprinkling) until the liquid is covered . Mix quickly and thoroughly into a paste.
- ♦ Do not use mortar that has already set .
