# MC- Quick Floor

## Cement Base- self leveling Flooring Compound

### Description:

**MC-Quick Floor** ready to use compound composed of sand cement based powder with balanced additives . only water has to be added to obtain a self – leveling compound for leveling concrete floors .

### Advantages:

- ♦ Easy to apply.
- ♦ Excellent leveling and high smoothing properties .
- ♦ Can be applied in single layer of 5 mm .
- ♦ Compatible with all emulsion adhesives and glues .

**Note :** the leveled surface is normally accessible after 24 hr . the gluing can be executed when the moisture content is sufficiently low , usually after 7 days for a 5 mm thick layer .

### Field of application:

For leveling interior cement sub floors prior to application of bonded finishes.  
(Carpets , vinyl , asbestos tile ... etc . )

### Technical data :

Self smoothing time	: approx 45 min. at 20 <sup>5</sup> C
Setting time	: 1.5-4 hr.
Time for application of water based glue	: after 24 hr.
Time for application of solvent based glue	: normally after 7 days

### Method Statements:

#### Surface preparation

Concrete floors must be free from dust , oil , grease and other impurities and faulty sections must be removed . smooth surfaces should be roughened mechanically .

#### Priming

No primer is needed, only wet the surface with water.

#### Mixing

Add progressively 25kg of **M C - Quick Floor** to 6-7 liters of water and mix with a low speed drill for 2-6 min. until a homogeneous compound is obtained .

### Application:

The mix should be used within app.30min. pour the compound over pre-wet floor and spread the material using notched trowel , For screeds over 5mm thick , application should be made in several layers each layer is cured . the finished surface should be protected against rapid evaporation .

**Quantity requirements:**

About 1.5 kg (dry product) per m<sup>2</sup> per 1mm. thickness.

**Packaging:**

**MC – Quick Floor** can be delivered in 25 kg multi layers paper bags .
